**DML INTRODUCES A SUSPENSION SYSTEM TO  
ALLOW CLEANING PIPES 18 INCHES AND LARGER.**

When used with the new **HDXL  
RIPPER** (Heavy duty XL) you have  
the ability to remove roots,  
grease, and debris in large  
diameter pipes.

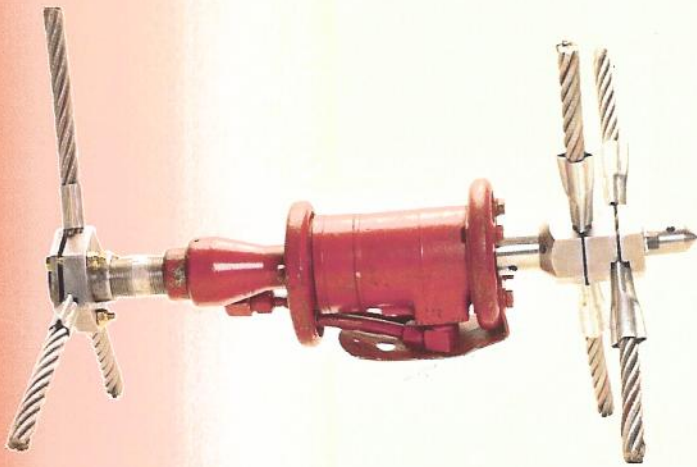

The **FlexKid** is available in  
two versions

- **FlexKid XL** 18 inch and larger pipes
- **FlexKid STD** 8 inches-18 inches pipes

*All kits provided with skids for  
three pipe sizes.*

# THE RIPPER

DML has developed a new **FlexKid** suspension system to provide you with a “skid system” allowing the use of your hydraulic motor in pipes 18 inches and larger. Its flexibility allows the **FlexKid** to

pass through a standard manhole opening. Durable and flexible, it is easily changed on site for different pipe sizes. So simple, you can even leave your rigid skids on the motor. The **FlexKid** travels the pipe easier than rigid sled or wheeled skids. Offset

joints, hand-taps, and debris don't stop your cleaning, given the small footprint and flexibility.

By combining the **FlexKid** with the RIPPER (recommended) you have an incredibly effective, efficient and practical pipe cleaning system.
